**Dialogues on Architecture, Urbanism and Housing:
The housing situation in Southern Africa today, a conversation with young professionals**

September 30th, 2020; online: <https://www.facebook.com/watch/?v=672207157010347>

This dialogue will focus on the housing situation in Namibia and South Africa from the point of view of young professionals in the built environment. It will explore the opportunities for interventions and the modalities that are available for young professionals to perform in this field. The session will conclude with collective reflections and the ways in which contemporary crises – such as COVID-19 – impact the outlook on housing and spatial practice in Southern Africa.

Participants: Natache Sylvia Ilonga (Namibia), Elao Martin (Namibia), Adwoa Agyei (South Africa), Senzo Mamba (South Africa), and Nomalanga Mahlangu (South Africa).

The session will be moderated by Dr. Guillermo Delgado, Coordinator of the Integrated Land Management Institute, at the Namibia University of Science and Technology.

The event is organized by the Mexican Embassy in South Africa, with support from the University of Johannesburg and the Namibia University of Science and Technology.

About ILMI. The Integrated Land Management Institute (ILMI) is a centre at the Namibia University of Science and Technology (NUST) coordinating and promoting transdisciplinary research, outreach and education in the fields of 'land, livelihoods and housing'. <http://ilmi.nust.na/>
